DETAILS WPC WALL PANEL

Wpc wall panel are ideal for any commercial or domestic, new build or refurbishment cladding project. You can use it as a color-stable alternative to real timber planks. Made from a unique combination of recycled wood and plastic, our highly developed and unique composition combines the traditional appearance of wood with the durability of an engineered composite.

Clips

Glue

Nail gun

Tape measure

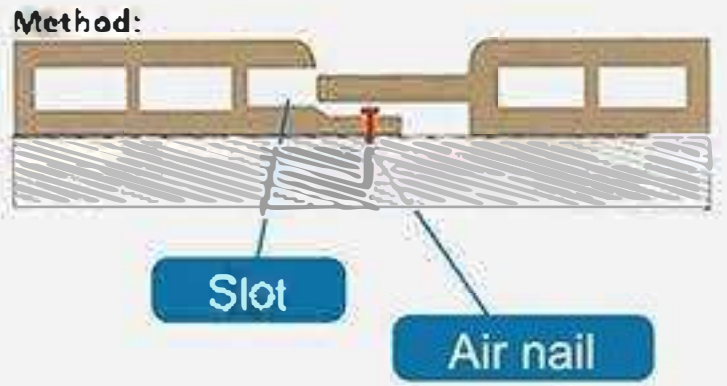

Woodworking planer

installation method

wall
wood keel
wallboard

Place the keel on the wall, to make sure the base is flat.
First fix the first panel with a gun nail on the keel.
Then insert next panel into the slot and fix it on the keel.
And next by next to finish the whole project.
